

SUSTAINABLE, DEFORESTATION-FREE COFFEE

La Prosperidad de Chirinos Coffee Growers' Agricultural Cooperative

We are a cooperative from Cajamarca, Peru. With more than 50 years of experience, we produce **high-quality, deforestation-free coffee**, developing our own bio-fertilizer plant, the first in Peru.

Discover
our story:

Together with Practical Action, we drive forward sustainable coffee production that protects the land:

1 Deforestation-free production:

800 coffee-growing families ensure sustainable production of the bean, along with traceability and geolocation in line with environmental compliance.

2 Own organic fertilizer plant:

1 ton of coffee waste managed each year for healthier soils and producers who gain access to lower-cost fertilizers.

3 Scaling up the experience:

We comply with the EU Deforestation Regulation (EUDR) and seek to strengthen the cooperative, connecting with markets and partners.

From the coffee field to the world

SUSTAINABLE COFFEE

Deforestation-free
and meeting international standards

BIO-FERTILIZER PLANT

The first in Peru
